

# An HIV-free

Ensure Our Youth Are Educated About Hiv,  
Get Tested And Have Access To Condoms

# Generation in Broward

## 60%

of HIV+ youth **do not know** they have HIV...

So they **don't get treatment**; are at **RISK for sickness or early death**; and **unknowingly pass HIV** to others.

Studies show **people with STDs** are at a **higher risk of contracting HIV.**

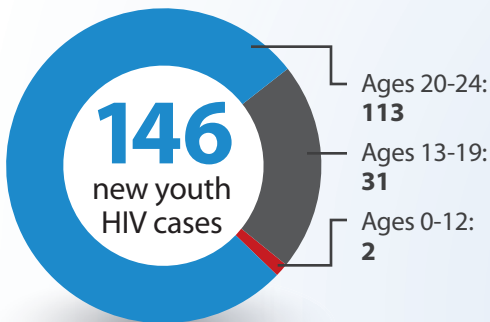

2011

**1,988**  
new teen  
chlamydia  
cases

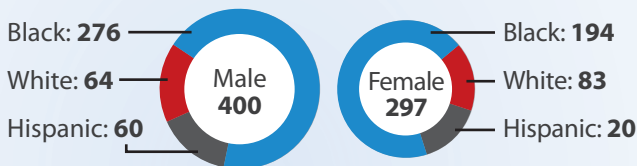

**454**

new teen  
gonorrhea cases

**31** new teen  
HIV cases

**69%** of HIV+ youths are between the ages of 13 and 24

## BROWARD HIGH SCHOOL STUDENT SURVEY

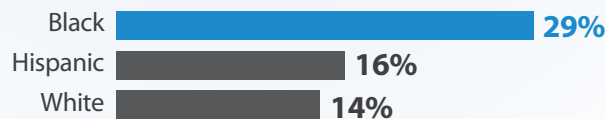

Has had sex	49%
Didn't use a condom	29%
Used alcohol/drugs before sex	22%
Had at least 4 partners	17%
Not taught about HIV in school	13%
Had sex before age 13	8%

## Young men

are **far more likely** than young women **to have HIV** and **less likely to get tested.**

Of the **22% of U.S. high school youths** who were tested for HIV and have had sex:

## YOUTH RISK FACTORS

- Unprotected Sex STDs
- Community HIV Rate
- Multiple/Older Sex Partners
- Using Alcohol/Drugs before Sex

**Get Educated Get Tested. Know your Status. Get HIV Care.**
